Restoring Glow to your  
Patients. Delivering Growth  
to your Practice.

# WHAT MAKES HALO™ UNIQUE?

HALO™ is the world's only Hybrid Fractional Laser that delivers a non-ablative and an ablative wavelength to the same microscopic treatment zone. Combining these two wavelengths creates a strong synergistic effect, resulting in ablative results with non-ablative downtime.

## TWO WAVELENGTHS:

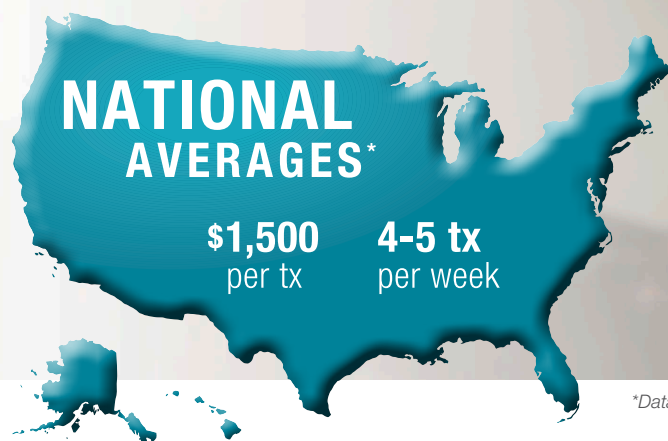

### NON-ABLATIVE 1470 nm

1470 nm is tunable from 200 to 700 micron penetration, the optimal depth for treating the epidermis and papillary dermis for the appearance of pigment irregularities, texture, and pore size.

### ABLATIVE 2940 nm

The 2940 nm Er:YAG laser provides pure ablation with no bulk heating, tunable from 20 to 100 micron penetration. This superficial ablation decreases healing time through faster clearance of Microscopic Epidermal Necrotic Debris (MENDs) and provides improved results due to an enhanced wound healing response from small ablative injuries.

## HALO PHYSICIAN BENEFITS:

- High revenue and profit generating procedure
- Consistent, predictable results in just 1-2 treatments vs. 3-5 traditional resurfacing treatments
- Easy to perform and safe to delegate
- Off face software templates for neck, chest, and hands
- All Fitzpatrick skin types
- Fast treatments with customizable energy density settings

*No wonder HALO™ has become a #1 procedure. The combination of great results and unmatched patient comfort has generated tremendous word-of-mouth among doctors and patients.*

# HALO TECHNOLOGY

## INTEGRATED HANDPIECE

The HALO™ hand piece includes integrated air cooling and smoke evacuation. The integrated cooling provides cold air across the treatment zone which provides patient comfort while smoke evacuation provides safety for the patient and operator. The integrated design makes it easy for treatments to be performed by one person.

## DTO TECHNOLOGY

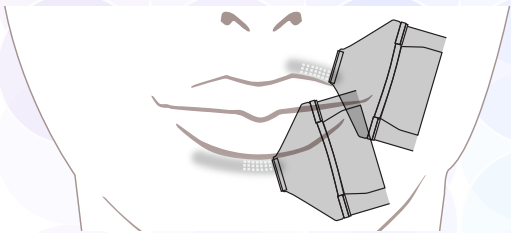

Dynamic Thermal Optimization (DTO) is built into HALO to automatically adjust the power of each individual 1470 nm pulse based on the temperature of the patient's skin. This feature makes HALO the most precise, safe, comfortable, and consistent non-ablative technology on the market.

## OPTICAL NAVIGATION

The high-speed optical navigation system on the HALO hand piece captures the motion of the hand piece hundreds of times every second to track the speed with extreme precision. Combining the optical navigation with sophisticated software to map the patient's skin, the safety of the treatment increases and creates a consistent treatment from beginning to end.

## ABP (ADJUSTABLE BEAM PLACEMENT)

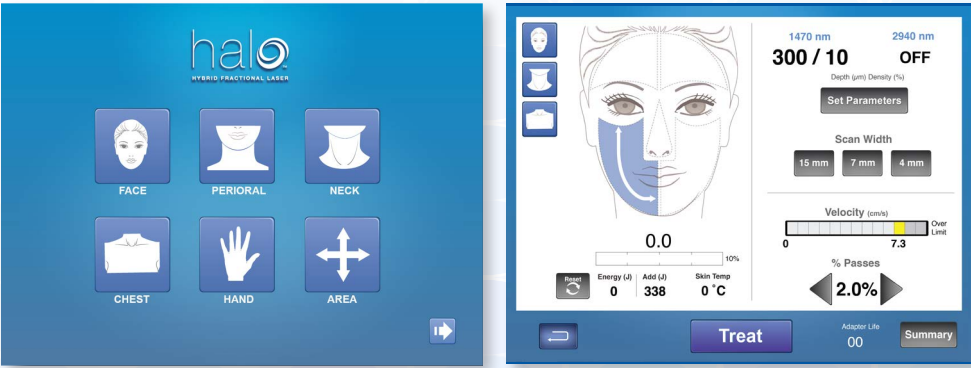

- ABP provides the ability to change both the size and position of the delivery beam
- Three beam sizes: 15 mm, 7 mm, or 4 mm
- Two beam placements: left or right
- Treat areas with distinct edges and linear scars

*With HALO, I can achieve results which I would have only expected from an ablative laser, but get downtimes that I would normally see with a non-ablative laser. It really is the best of both worlds.*

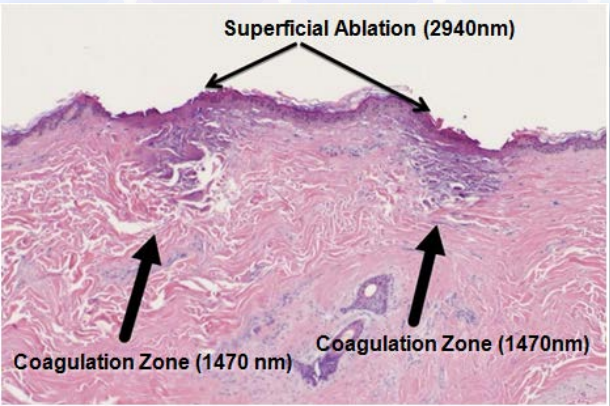

**JASON POZNER, MD, FACS** | Plastic Surgeon

## INTUITIVE MAPPING

## HALO HISTOLOGY

Each wavelength can be tuned independently for precise coverage and depth.

*I recently added HALO to my practice and I have been impressed by patient comfort and low downtime, while still providing amazing results after just 1-2 treatments. It has greatly enhanced my skin revitalization practice.*

**BARRY DIBERNARDO, MD** | Plastic Surgeon

## HALO APPLICATIONS:

- Wrinkles and fine lines
- Sun damage/dyschromia
- Skin texture
- Skin resurfacing
- Scar revision (including acne scars)
- Signs of aging
- Pigmented lesions
- Improves appearance of enlarged pores
- Medical dermatology/Actinic Keratoses

## HALO PATIENT BENEFITS:

- More comfortable than traditional fractional resurfacing
- Fast healing, patients back in make-up within 24 hours
- Low downtime, patients are able to go back to work within a couple of days
- No occlusive post-care
- Noticeable improvement within weeks

“

*HALO offers an innovative approach to resurfacing. It's very comfortable and predictably delivers great results. It has quickly become the most utilized procedure in my practice.*

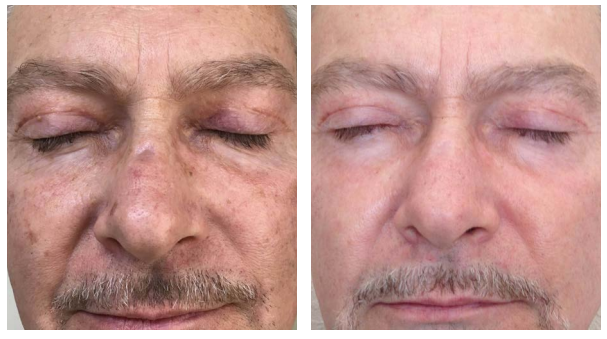

**ARISA ORTIZ, MD** | Dermatologist

# THE SCITON EDGE

## BUILD THE PERFECT SYSTEM FOR YOUR PRACTICE

HALO™ Hybrid Fractional Laser (HFL) is just one of the modules offered on The Sciton JOULE™ multi-application system. JOULE is the world's only expandable platform to offer an unprecedented array of laser and light wavelengths through any of its three distinct delivery modes: arm, fiber and BroadBand Light™. As a result, JOULE allows practitioners to provide the widest range of aesthetic, medical and surgical procedures from a single platform.

## POST SALE SUPPORT

Sciton prides itself on partnering with you from the beginning and beyond.
